

Flair, Elegance & Style

Those are the qualities captured in the beauty of this home. The flair of timeless design coupled with the elegance of the highest quality of construction techniques and materials and the style of exquisite interior finishes makes this home exceptional by anyone's standards. 

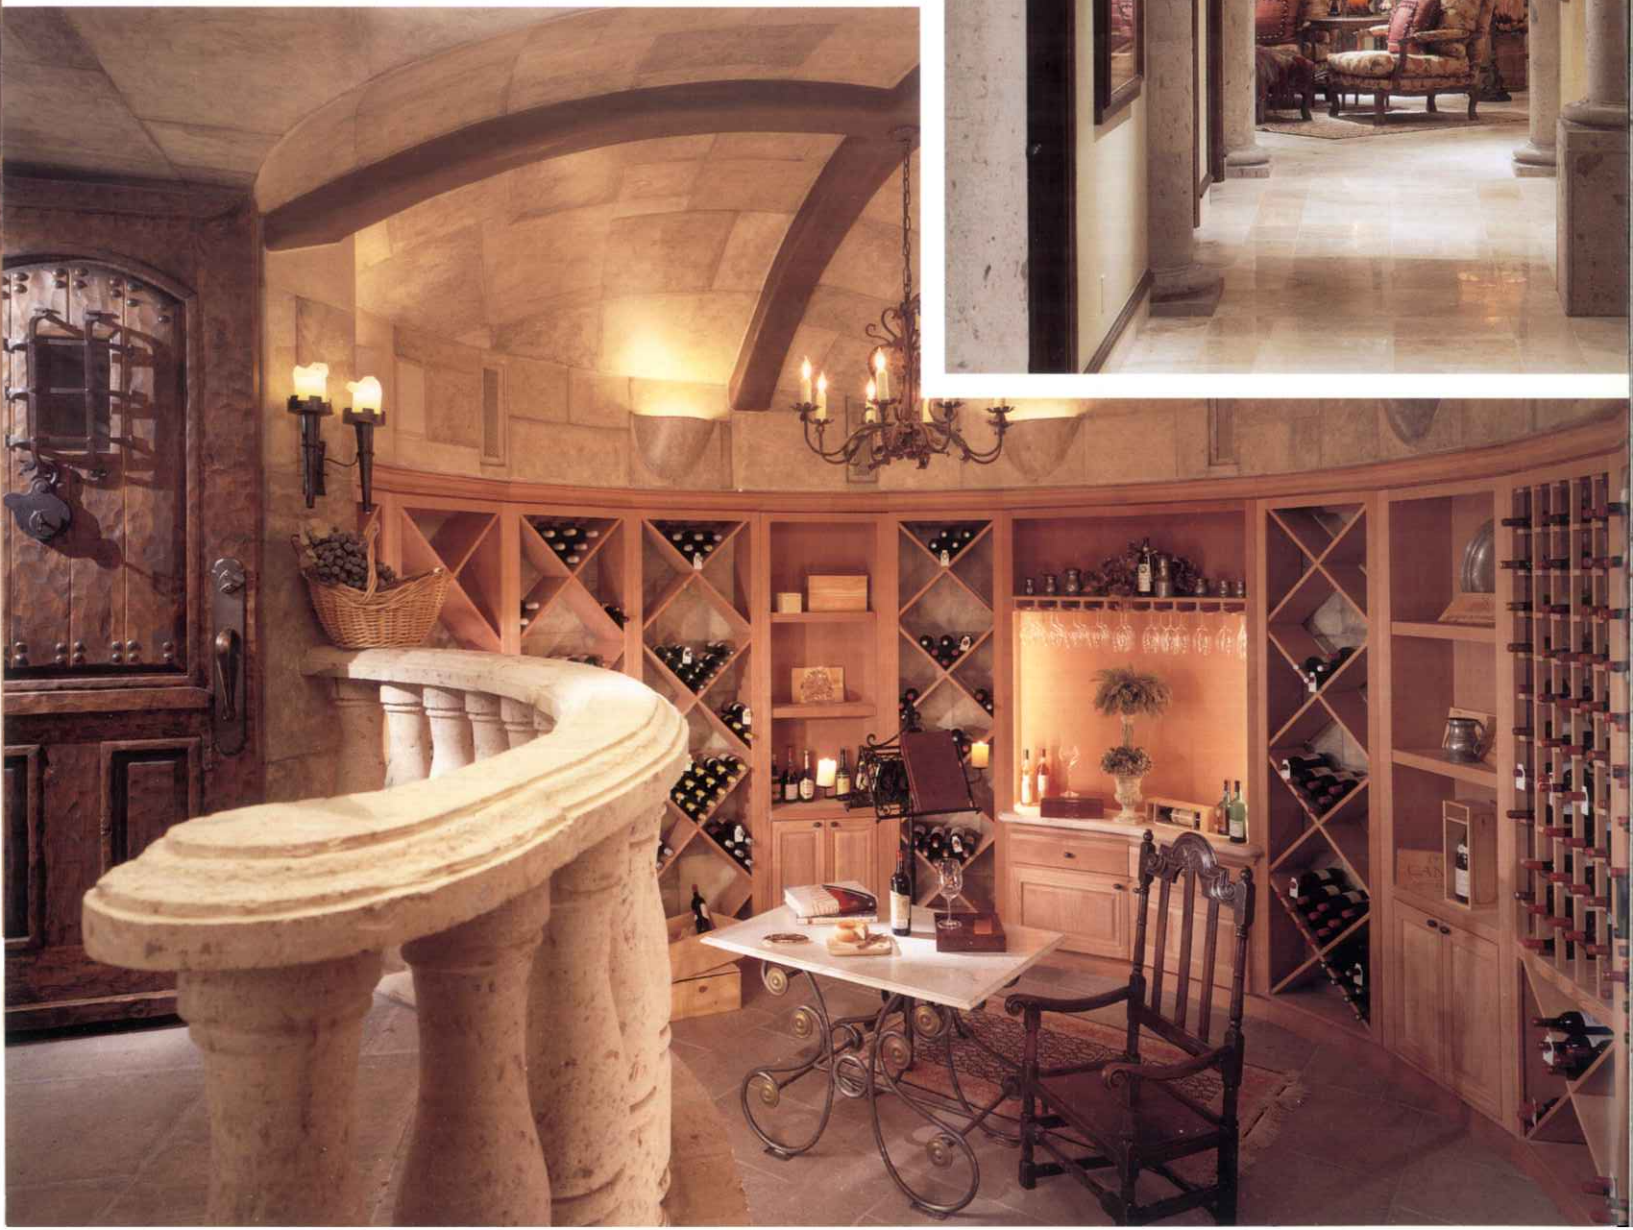

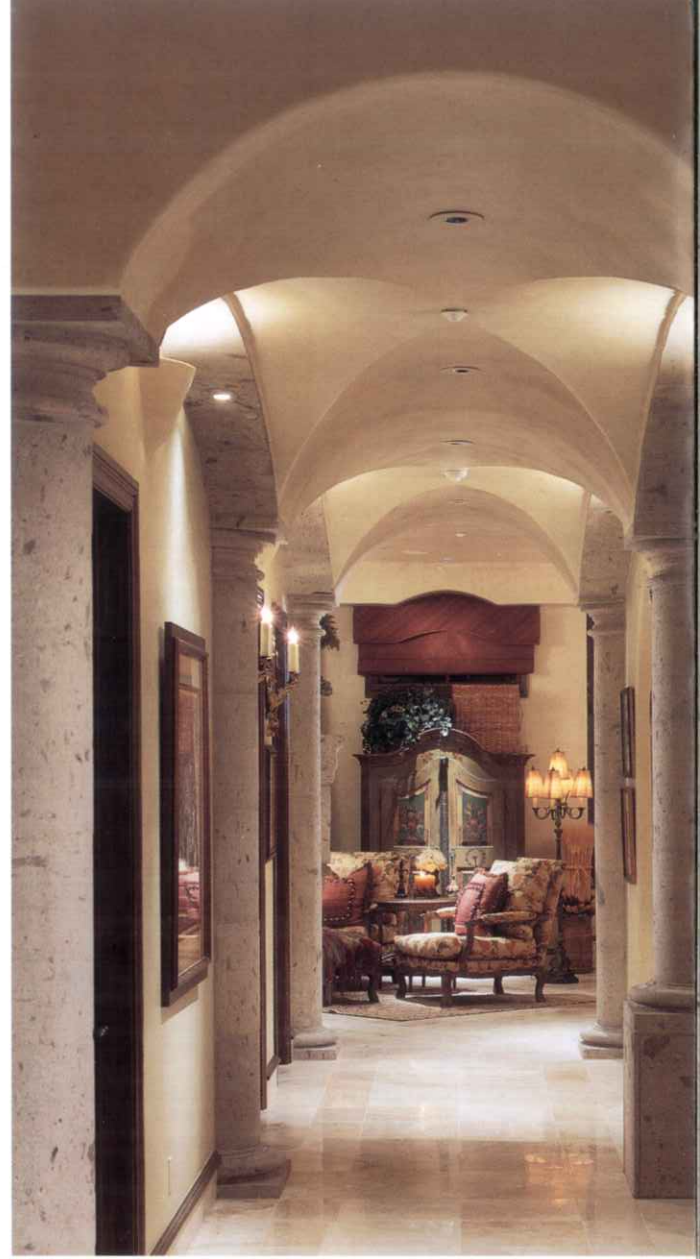

Excellence of Design & Construction

It took a special team of talent from the worlds of architecture, construction, and interior design to collaborate with these discerning clients to envision and then create the ambiance pictured here. That team consisted of architect, Lee Hutchison, AIA and his firm of Urban Design Associates, Ltd., Ken Madden and his team from Shiloh Custom Homes, and Paula Denboer and her team from Paula Designs.

romance

This award winning combination of professionals dealt effectively with the steep, rocky site to capture dramatic, panoramic city views in comfort and style. Attention was paid to every detail during design and construction, along with each piece of special fabric and furniture design that completed every elegantly appointed space. This 9,000 + square foot home has a formal living area and informal sitting room off the kitchen, with a removed den and master suite on the top level. On the lower level are separate guest quarters, a game room, and a fabulous wine cellar to entertain international guests.
